- Online service can be purchased with a credit card.
- It can be accessed from anywhere with its web-based program.
- It is user-friendly thanks to its multi-language support.
- Flexible filtering and reporting features provide advantages for businesses.

Design Features:

- Power socket options suitable for needs
- Frame types for all applications

Pedestal Electric and Water Station

- Transparent cover

- Terminal input/output

- Independent water compartment

Control Card\Reader Features:

- CPU : 2.4 GHz dual core
- Memory : 32 GB DDR3 RAM
- Screen : 128x64 LCD screen
- Reader : 13.56 MHz contactless mifare
- Operating temperature : -30°C +85°C
- Communication : WiFi / LoRaWAN

Mechanical/Electrical Properties:

- Dimensions: 1280X445X320 mm
- Body : Technopolymer
- Elektrik : IP 67 socket, Single-phase, three-phase socket option
- Fuse and Residual Current Relay for each user
- Four-sided lighting
- Water : Faucet for each user
- Compliant with IEC 60439-1 standards
- Body protection class : IP 56
- Impact resistance: IK 10

Electric & Water Meter:

- Compact design, Rail Mount
- Pulse Output
- Multiple Measurement
- Bidirectional Measurement
- Compliant with IEC 62053-21 standards active energy measurement class:1
- Direct input up to 100 A, x\5A for 125A and above currents
- Water meter :
 - Plastic / stainless
 - Pulse output
